

Leadership for Managers in Mining

ASSOCIATE CERTIFICATE

Reduce the stress of people management while you establish the building blocks as a respected leader equipped to lead your team to success.

Being promoted to leadership roles often comes from technical ability and expert discipline knowledge. However, leading people requires additional skills and self-knowledge. This course is designed to give you the skills, frameworks and insights to understand how to be the leader your team needs to reach both their full potential and business objectives.

From leading teams across remote sites to 24-hour operations, the resources sector offers unique challenges for leaders, underpinned by continuous change, pressure to perform and complex corporate expectations. This course has been developed by leaders with decades of experience working in the sector, with field-proven experience building and leading teams successfully in these environments.

PD hours

20 hours
