

FUTURE MINING 2019 – CONTENTS

Artificial Intelligence

Automated rock quality designation (RQD) estimation from digital images of drill cores using convolutional neural networks	5
F Al-zubaidi, P Mostaghimi, G Si, P Swietojanski and R T Armstrong	
A novel physics-AI based hybrid digital twin for enhanced gold recovery	8
S Bhongale and P Moyo	
Automating load-haul-dump cycle data capture with machine vision and deep neural networks	11
C Higgins	
A workflow for assessing interpretation uncertainty in spatial domains using Bayesian approximation	14
S McManus, J Coombes, A Horta and A Rahman	
Predictive maintenance in mining	19
J C Pellicer	
Machine learning – a new paradigm for resource geology	23
S Sullivan, C Green, D Carter and H Sanderson	

Automation and Robotics

Analysis of model fidelity between exploration and blast-hole based models: a cross-validation style testing	26
M Balamurali, J Zigman and A Melkumyan	
Reduction of personnel in exposed areas, safety devices and early steps towards robots in mining	29
M Berner, N A Sifferlinger and P Moser	
The use of automated drones in underground hard rock mines.	34
E Jones, D Reardon and S Hrabar	
Automation gaps to achieve zero entry mining in surface mining operations	47
P F Knights and G Yeates	
Development of mining automation system at Northparkes	55
Z Li, B George and M Plummer	
Intelligent coal mining technology development and prospect in China	65
G F Wang, Y H Pang and H W Ren	
Automation of ground control for mine shaft sinking – a step forward	68
M Weber, C Garcia Pina, S Bock, J Franz and J Henriquez	

Big Data

Virtual reality data exploration and mine planning with the real-time mining control cockpit	72
D Buttgereit and J Benndorf	
VoxelNET: a digital middleware platform for mining industry 4.0	74
C Sennersten, C Lindley, B Evans and E Sellers	
Identifying barriers and pathways to sustainable mixed reality simulation for the mining industry	77
P Stothard, A Squelch, R Stone and E Van Wyk	
Beyond Excel: power BI and your databases	83
C Vincent, M Demmer and S Boddington	
Application of the mining cloud platform in mining industry	85
Z Yang, C F Guo and G H Zhang	

Future Mining / Green Mining

Mining and mineral exploration: public participation at an early stage in Finland, Germany and Spain	89
L Benighaus	
Implementation of sustainable mining methods for the Platina Scandium Project in NSW	92
J A Horton and G Steyl	
Recovery of gold ions from ammonium thiosulfate using synergistic effect of aluminum and activated carbon	96
S Jeon, H Takahashi, C B Tabelin, M Ito and N Hiroyoshi	
Satellite-bound monitoring of mine sites	99
J Kretschmann, S Möllerherm, P Goerke-Mallet and C Melchers	
Reprocessing of ferriferous nickel laterite siltation sediments into magnetic nanoparticles through coprecipitation	107
E Opiso, L M Ramos, J P Aseniero, J R Delfinado, I Park, A Orbecido and C B Tabelin	
Social license to operate in the coal industry	111
J P Orchard	
Application of pre-concentration technologies in sublevel stope mining	114
F Sotoudeh, M Nehring, M Kizil and P Knights	
'Social License to Operate' is an industry narrative laden with unconscious bias	123
D Yeates	

Mine Internet of Things

Applications of LoRa wireless relay networks in underground mining	125
P Branch, B Li and K Zhao	
IoT dashboard implementation into mining operations using encrypted wireless mobile telecommunications and cloud infrastructure	127
T D Hadley and A A Monch	
Clustering routing based on link quality estimation for disaster monitoring sensor network	130
Q S Hu, D W Luo, M X Zhang and S Y Li	
Observation of crack initiation and propagation in coal subjected to heating and cooling	131
J Kodama, R Naka, T Minami, T Sugawara, A Hamanaka, K Itakura, G Deguchi, D Fukuda and Y Fujii	
A cost-effective positioning and communication technology for the underground mine IoT application	134
B Li, K Zhao and S Saydam	
Node re-localization for anchor drifting scenarios of post-disaster in coal mines	137
M Li, Q S Hu, H N Zhang and W. Yang	
IoT application to rock engineering	139
R Mitra and S Madonsela	
Implementation of 'edge sensors' into mining operations	142
A A Monch and T D Hadly	
A flexible global telemetry and IoT solution that enables instant custom remote monitoring and automation anywhere	144
D Scott	
Mobile 3D imaging in underground coal mines: a case study	145
S K Singh, S Raval and B P Banerjee	
Investigation of nature-like rock joint shear behaviour using 3D printing	149
J Zhang, J Oh, G Si and H Roshan	

Mineral Processing Frontiers

Alternative energy roadmap for the mining and mineral processing industry M Allen	152
Technospheric mining of critical and strategic metals from metallurgical by-products R D Alorro, D Ibana, S A Jones, Z T Ichlas, B Lim, M R Kurniawan and G G Lee	157
The importance of water quality monitoring in mineral processing plants G Bournival, N Lambert and S Ata	160
Use of process water in reverse cationic flotation of iron ores I V Filippova, L O Filippov and A Frade	161
An advanced passivation technique of sulphide minerals in mine wastes for preventing acid mine drainage formation I Park, M Ito, C Tabelin and N Hiroyoshi	165
Towards sustainable mine waste management: finding value in mine wastes via the ferrite process and geopolymerisation C B Tabelin, T Igarashi, H Uchiyama, P Herrera, E M Opiso, J P J Aseniero and C Maestre	169

Space Mining

Resource exploration strategies for lunar polar volatiles S Casanova, C Espejel, A G Dempster, R C Anderson, G Caprarelli and S Saydam	173
Lunar Ore Reserves Standards 101 (LORS-101), a First Code for the Reporting of Lunar Exploration Results, Lunar Resources, and Lunar Reserves C D Espejel Garcia	176
Resource modelling for mining on the moon, Mars and asteroids C A Lindley, C C Sennersten, B Evans and E Sellers	181
Using biomimicry to address engineering challenges in space mining N S Melkounian	183
Developing the case for mining resources on the Moon T M Pelech, A Dempster and S Saydam	185
Space Mining: why, what, where (and when) M Sonter	189

Technology Integration and Management

Value-driven optimisation using integrated technology solutions R Chandramohan, M Pyle, R Byfield and R Whittering	193
Real time LHD dispatch optimisation at Newcrest's Cadia Valley Operations S Donaldson, B Hollis, K Wynn, L Potts and M Evans	198
Asset health process as a thrust for asset performance management (APM) Y Fedichkin and C Perez	203
A golden age for optimisation in the mining industry B Hollis and J White	209
The Vortecone: a new maintenance-free wet scrubber device A Taylor, S Schafrik and A R Kumar	216
