

PACRIM 2019 CONTENTS

KEYNOTES

A catchment analysis approach to the interpretation of regional stream sediment data: examples from the Canadian Cordillera <i>D C Arne</i>	2
Well-being and mental health in Kaikōura rebuild <i>S H Bell</i>	5
New geochemical exploration tools to aid discovery of porphyry deposits – a case study from Resolution, Arizona <i>D R Cooke, M Baker, J J Wilkinson, P Agnew, J B Gemmell, L Danyushevsky, P Hollings and N C White</i>	12
Orogenic deposits: new approaches to old goldfields in New Zealand <i>D Craw</i>	14
What is the link between Cu-Au mineralization and modern seafloor hydrothermal systems associated with submarine volcanic arcs? <i>C E J de Ronde</i>	21
Principles for social performance in mining <i>S A Flynn</i>	23
Geological evolution of China and the resulting spatial-temporal distribution of gold resources <i>R J Goldfarb, Z Chang, K Qiu, N C White and Z Yang</i>	26
Making the most of multi-element geochemistry <i>S W Halley</i>	30
The business of mineral exploration, challenges and future trends <i>D J Kirwin</i>	32
Space resources – separating the hype from reality (but it is closer than you think) <i>L D Meinert</i>	34
The (dis)organisation of structural controls on epithermal mineralization <i>N H S Oliver, J Rowland, J G McLellan and R J Holcombe</i>	36
Applications of machine learning to model 3D geological attributes of mineral deposits using multi-element geochemical data <i>J C Ordóñez-Calderón</i>	40
Exploration litho-geochemistry for volcanogenic massive sulfide (VMS) deposits <i>S Piercey</i>	43
Easy alteration mineralogy – are we there yet and why do we need it? <i>S Pontual</i>	45
Subduction seismic style, fluid release, and orogenic gold mineralisation in fore-arc settings <i>R H Sibson</i>	49
Boiling zones and precious metal mineralisation in epithermal environments <i>S F Simmons</i>	51
Generating ore body knowledge fit for manufacturing purpose – future trends and challenges in geometallurgy <i>S G Walters</i>	53

EXPLORATION, MINING INVESTMENT AND NEW PROJECT DEVELOPMENTS

Advances in exploration techniques

A speedy update on machine learning applied to bedrock mapping using geochemistry or geophysics: examples from the Pacific Rim (and nearby) 58
S H Hood, M F Gazley, M J Cracknell, S Barker and A M Reading

Processing of historical geophysical data as an aid to mapping alteration and mineralisation in the Wafi-Golpu porphyry system, Papua New Guinea 62
T Hoschke and K Frankcombe

The Century Day – accelerating information, not just data, from drones 66
S Micklethwaite

Porphyry exploration at FQM – active application of new techniques 67
S Sykora, T Ireland and S Kuhn

Mining investment and new project developments

Russia – open for business 70
G S Collins and T Bowens

Improved reporting of mining 'Feasibility Study' results 72
N Cusworth, P Harper, P Jolly and L Queen

MINERAL SYSTEM UNDERSTANDING

Geometallurgy

Automated identification of sulphides from drill core imagery 79
M J Cracknell, A Parbhakar-Fox, L Jackson, N Fox and E Savinova

X-ray based technologies for geometallurgical characterisation 83
N Fox, A Parbhakar-Fox and G Gloy

Calculated sulphide-sulphate mineral distribution in the Mount Carlton Au-Ag-Cu deposit 87
N Howard

Approach to building a geoenvironmental block model for the Walford Creek Project, Aeon Metals 90
L Jackson, G Maddocks, P Long and S Tear

Geometallurgy of tailings: unveiling the next generation of mineral resources 94
A Parbhakar-Fox

Geometallurgical tools to understand acid and metalliferous drainage risks for Pacrim mining projects 98
P Weber, K Malloch and G Kerr

Mineral systems and exploration targeting

New evidence of magmatic-hydrothermal activity of porphyry-epithermal system in the reararc of Izu-Bonin-Mariana 101
B G Caetano, E M Bongiorno and R Neumann

Mineral potential mapping of porphyry targets at the Bundarra Cu-Au project, Queensland 105
G Luketina

Spatial and temporal controls on mineral systems 107
S A Occhipinti, M D Lindsay, V Metelka and A R A Aitken

New technologies for detecting and characterising mineral systems 111
Y Uvarova

Multi-scale characterisation

- 3D tomography and geochemistry of drill cores reveals geological structures, minerals, textures – combined data for maximised results 113
M Bergqvist, A Hansson and E Landström
- Multivariate data analysis and machine learning – towards robust geometallurgical domains: examples from the Pacific Rim 114
M F Gazley, N Caciagli, S B Hood and A McFarlane
- Multi-scale characterisation of path-finder element and gold microstructures, Alturas Au-Ag Deposit, El Indio Belt, Chile 117
M A Pearce, M F Gazley, B M Godel and R Guerra
- Multi-scale modelling of the Martha epithermal Au-Ag deposit, Waihi, New Zealand 121
M Stewart, L Crawford-Flett and P Church
- Rapid structural modelling from core photography at the Zafranal project, Peru 126
S Windle, S Mortimer, E Linares, J-C Barreto, L Romero and M Rozas

MINERALISATION STYLES

Epithermal systems

- 'The devil is in the detail' – vein mineralogy and texture as an aid to exploration in the Hauraki Goldfield, New Zealand 132
A B Christie and M P Simpson
- Geology and mineralization in the Suyoc epithermal deposit, Mankayan District, Philippines: insights from ore mineralogy, fluid inclusion microthermometry and stable isotope studies 138
J A Gabo-Ratio, O B Soberano, K L Queano, G P Yumul Jr and K Yonezu
- Identifying surface manifestations of epithermal systems: processes and products 141
A Hamilton, K A Campbell, D M Guido and J V Rowland
- Geophysical properties of rocks from the Hauraki Goldfield (New Zealand), supporting continued mineral exploration 145
R Kellett, F Caratori Tontini, G Turner and C Bromley
- Alteration in epithermal Au-Ag and geothermal systems in New Zealand: insights for mineral exploration 149
M P Simpson

Intrusion-related Au, IOCG, skarn and replacement deposits

- Gold mineralization and its relation to intrusive rocks at the Hogatza mine camp, Alaska 155
D D Adams, R Kukowski, J Birch, K Greenfield, D Miller and R Goldfarb
- Rare metal concentration triggered by sulfide dynamic recrystallization 158
A Cugerone, B Cenki-Tok, E Ollot, M Munoz, F Barou, V Motto-Ros, K Kouzmanov, E Le Goff and A Chauvet
- Character and paleotectonic setting of mesoproterozoic iron oxide deposits of the St. Francois Mountains, Missouri, USA 159
W C Day, E A duBray, A E McCafferty, A H Hofstra, J N Aleinikoff, C A Johnson and R A Ayuso
- Source and transport paths in large hydrothermal systems: mapping and geochemical modelling of albitisation and veins around IOCGs 162
N H S Oliver and J S Cleverley
- Townsville Cu-Au prospect, Ok Tedi district, Papua New Guinea: a breccia system zoned from Cu-Au-Ag skarn to carbonate-base metals-gold mineralization 165
P J Pollard, R Jongens, R Smillie, M Mollomb, M Erceg and P Olubas

Porphyry Cu, Au-Ag, and PGE deposits

Geographic dependency of epidote and chlorite chemistry in distal porphyry alteration and its impact on developing global exploration tools 171
D Araujo, A Pacey, P Agnew and D Cooke

Tujuh Bukit Deposit, Banyuwangi Province, East Java, Indonesia 173
J Bartlett

Malmyzh Cu-Au porphyry – flagship discovery in an emerging porphyry-epithermal belt, Russian Far East 174
G S Collins, T Bowens and D Bukhanova

Time in porphyry Cu-Au development – exploration implications 177
G J Corbett

The geology and mineralisation of the world-class Alpala porphyry copper-gold deposit in northern Ecuador 181
S Garwin, B Whistler, S Vaca, J Ward, N Mather, J Silva, B Rosero, A Cruz, C Diaz, A Chafra, S Mantilla, L Aguilar, M Chand, A Guachamin, K Morales and N Guerrero

Platinum potential of the Pacific Rim in connection with ultramafic zoned intrusions 189
Y Nazimova and G Ryan

Update on structural controls and timing of copper-gold porphyry and skarn mineralisation in the Tifalmin and Nong River Districts, Star Mountains, Papua New Guinea 192
L D Queen and L Ulaiwi

Porphyry deposits: genetic models using hyperspectral imagery data of drill core for exploration and mining applications 196
E Savinova and R Carey

Sediment hosted/Carlin deposits

Controls on gold mineralization in Carlin-type gold deposits: an example from Goldrush, Nevada 200
S L L Barker and J R Vaughan

Hydrological setting and geological controls on hydrothermal fluid flow in Carlin-type gold deposits 201
K A Hickey and A Steiner

Toward a global Carlin-type exploration model 204
M W Ressel, C L Johnson and E R Hollingsworth

Structure of sediment-hosted gold deposits in the Great Basin and China: genetic and exploration implications 209
D Rhys

VMS: ancient and modern

A decade of near-seafloor geophysical surveys at Brothers volcano (southern Kermadec Arc, New Zealand) 214
F Caratori Tontini, C de Ronde and M Tivey

Comparing and contrasting our knowledge base and gaps in ancient volcanogenic massive sulphide (VMS) deposits via comparisons to modern seafloor massive sulfide (SMS) systems 215
S Piercey

Hydrothermal fluid chemistry at Brothers submarine arc volcano 218
V K Stucker and C E J de Ronde

GoldTrace: tracking the origin of precious metals in seafloor arc lavas 219
C Timm, M Hannington, M Portnyagin, C E J de Ronde, M Leybourne and R J Arculus

PROVINCES AND CASE STUDIES

Australia and China

Mineral potential mapping in western NSW: new insights into the distribution of IOCG, VMS, orogenic gold and Broken Hill-type mineral systems 225
A Ford, G Partington, K Peters, P Blevin, P D Downes, J A Fitzherbert and J E Greenfield

Exploration for sedimentary-hosted carbonate base metal mineralisation at Manuka, Winduck Shelf, Darling/Cobar Basin, NSW Australia 228
J Lally, N Lindsay, K Prendergast and A Vigar

Fertile magma genesis: a zircon perspective 231
C Leslie, S Meffre, D Cooke and J Thompson

Distribution of gold within the Dargues Reef alteration system 233
A Lorrigan and D Vukovic

Development in understanding of the Tritton-Girilambone Cu district, Australia: resolving hydrothermal mineralisation in multiply-deformed rocks 237
T Murphy and B Cox

Metallogenesis of stratabound Cu mineralization in the Dabaoshan deposit, Northern Guangdong Province, South China 240
H Y Qu

New Zealand – epithermal and orogenic gold

The Sams Creek porphyry gold deposit, Northwest Nelson, New Zealand 244
P V M Angus, R Jongens, Y Nazimova, M J McCulloch and G Ryan

Structural setting and discovery of new resources within the Hyde-Macraes Shear Zone, Macraes Mine, New Zealand 248
H Blakemore, A Allibone, D Craw, D MacKenzie, J Moore and P Jones

Exploration of epithermal quartz vein systems at Waihi, Hauraki Goldfield 252
L Crawford-Flet

Road to discovery at WKP, New Zealand 256
R Streiff, S Randall, F McArthur, T Gardner and L Torckler

Regional crustal structure, fluid and metal transport pathways of Otago illuminated by geophysics 260
P Upton, D Craw, M Reyners and D Eberhart-Phillips

New Zealand – gold, tungsten and industrial minerals

Epithermal zeolite mineralisation, central Taupo Volcanic Zone, New Zealand 264
R L Brathwaite and A Rae

Biogeochemical exploration: orientation surveys in New Zealand 267
C E Dunn and A B Christie

Textures and grain size of scheelite as a potential byproduct, Macraes Au mine, New Zealand 270
D MacKenzie, M Grant, H Blakemore, P Jones and D Craw

Placer garnet of the west coast of the South Island, New Zealand 274
T Ritchie and J Scott

New Zealand – prospectivity and potential

Understanding the mineral potential for critical elements in New Zealand: the case for nickel and cobalt 278
P M J Durance, M P Hill, R E Turnbull, R Morgenstern, M S Rattenbury and R W Smillie

An update on new mineral potential modelling of onshore Zealandia <i>M P Hill, A B Christie, P M J Durance, A P Martin, R Morgenstern, R E Turnbull and R W Smillie</i>	283
Regional-scale multi-element in soil baseline surveys over prospective mineral camps in New Zealand <i>A P Martin, R E Turnbull, M S Rattenbury, D T Strong, A B Christie, K M Rogers, M F Gazley and R W Smillie</i>	290
Targeting lithium mineralisation in the Taupo Volcanic Zone, New Zealand <i>S H H Nielsen</i>	293
Increasing accessibility and interoperability of New Zealand geoscience information for mineral exploration <i>M S Rattenbury</i>	296
The mineral systems of the Zealandia continent: 500 million years and counting <i>R W Smillie, A B Christie, P M J Durance, P Hill, A P Martin, N Mortimer, M S Rattenbury, A J Tulloch and R E Turnbull</i>	300
North and South America	
Deseado Massif hot spring deposits (Late Jurassic, Patagonia, Argentina) and their association with epithermal systems <i>D M Guido and K A Campbell</i>	304
The Antakori Cu-Au-Ag Project, Northern Peru <i>K B Heather, H Gamarra, S Mortimer and S Redwood</i>	307
Geology and exploration of the Keno Hill Silver District, Yukon, Canada <i>A McOnie and S Iles</i>	310
Exploration and resource growth at the Buriticá Gold Project, Colombia <i>I Taylor, M Castenada, A Vigar and K Prendergast</i>	313
The role of multidisciplinary interpretation for porphyry copper targeting in the South American Andes <i>M Trott and A Farrar</i>	316
Papua New Guinea, Indonesia the Philippines and Pacific Islands	
Liamu Igneous Complex, PNG: significance for late Miocene-Pliocene mineralisation along Papuan Peninsula and PNG tectonics <i>R H Findlay</i>	322
Exploring the Wapolu detachment-related mesothermal and epithermal gold deposit, Fergusson Island, PNG <i>S M Munroe and M Wilson</i>	326
Review of nickel-cobalt laterites in Papua New Guinea <i>L D Queen</i>	327
Makatea Island exploration leads to new phosphate discovery <i>C Randall, S Faaeva and C J Egretaud</i>	330
Discovery paradox and case studies – Cracow and Kainantu <i>A Vigar, P Dale and K Prendergast</i>	336
