# LIFE-OF-MINE 2016 CONTENTS

## Keynote Abstracts

**Natural Capital Accounting – a Sea Floor Mining Application**  
*R Grogan*  
2

**Responsible Management and Transparent Reporting across the Project Life Cycle**  
*M A Noppé*  
5

## Acid and Metalliferous Drainage

**Defining Residual Risk for Successful Mine Closure – a Geochemical Perspective**  
*M Edraki, P Pham, J Park, T Baumgartl, B Noller and B Forsyth*  
9

**Geostatistics and Sample Numbers from an Acid and Metalliferous Drainage Perspective**  
*D Kentwell, A Garvie and C Linklater*  
12

**Water-related Data Requirements for Improved Life Cycle Assessment of Mining, Mineral Processing and Tailings Management**  
*S A Northey, N Haque and G Mudd*  
16

## Closure – Risks and Lessons

**Dynamic Decisions under Uncertainty – a Case Study on a Gold Mine**  
*W Chen, N Langrén, T Tarnopolskaya, Z Zhu and M Cooksey*  
20

**Global Lessons for a Local Problem – Rehabilitation Bonds and Victoria’s Latrobe Valley Coalmines**  
*M L Cramer and N P Wines*  
24

**Closure Liabilities – Where Are We at?**  
*M Slight and H Lacy*  
28

**A Black Canvas – Planning a Greenfield Coalmine in New South Wales**  
*T W C Stambolie*  
31
A Simulation Approach for Improving the Assessment of Closure Risks  
*D Trembath*  
36

‘MRC-wiki’ – a Mine Rehabilitation and Closure Knowledge Management Tool for Central Queensland Coalmine Practitioners  
*C J Unger, C J Bond, T Baumgartl, V C Glenn and P Sabourenkov*  
39

**Coal – Environmental Sustainability Issues**

Planning Effective Management of Gas Emissions in an Underground Coalmine  
*D J Black*  
44

Development, Simulation, Economic and Environmental Evaluation of a Coal Processing Flow Sheet  
*J Huang, N Haque, M O’Brien, G O’Brien and J Tien*  
48

Can Australian Coal Alleviate Energy Poverty in India – a Case Study  
*A C Keith and H von Blottnitz*  
52

Thermal Coal Industry – Is Longwall Mining Currently a Life-of-mine Option in Australia?  
*T W C Stambolie*  
57

**Landform Stability and Climate**

Accounting for Vegetation Dynamics in Landform Evolution Modelling  
*J Boyden, J B C Lowry, T J Coulthard, T Whiteside, G R Hancock and S Grant*  
63

Use of Landform Evolution Models to Assess Uncertainty in Long-term Evolution of Post-mining Landscapes  
*G R Hancock, T J Coulthard and J B C Lowry*  
67

Life-of-mine Planning Tools for a Changing Climate – Intuitive, Interrogative, Iterative  
*J H Hodgkinson, S Crimp, W Jin, P Kokie and M Grigorescu*  
71

Application of Synthetic Rainfall Data to Long-term Modelling of a Rehabilitated Landform  
*J B C Lowry, D Verdon-Kidd, G R Hancock, M J Saynor and T J Coulthard*  
75
Managing Mine Wastes

Long-term Monitoring and Targeted Assessments to Improve Management of Mine Wastes – the Batu Hijau Project
   B M Angel, S L Simpson and J Waworuntu
   81

Findings and Conclusions Following ‘Long-term’ Cover System Monitoring – Refinement of the Conceptual Design for Tailings Storage Facility Closure
   R Barritt, K Albano and P Scott
   85

Rainfall Patterns Rather than Climate Classification Control Cover Design for Closure
   T Baumgartl and B Richards
   89

Characterising the Spontaneous Combustion Propensity of Waste Rock
   B Beamish and J Theiler
   93

Waste Rock Pile Construction to Lower Closure and Relinquishment Costs
   J R Taylor, S M Pape, B S Davis and J A Muchan
   97

Measuring and Modelling for Long-term Water Management

Simulating Integrated Hydrology in Mining Catchments from Planning to Closure
   D N Graham and S Szydlarski
   101

Applying Water-sensitive Mine Design to Optimise Social, Environmental and Economic Outcomes
   M J Ind, K Brand and M Rynhoud
   106

Measurements and Modelling of Evaporation from Abandoned Mine Pit Lakes
   109

Backfilled Pits – Laboratory-scale Tests for Assessing Impacts on Groundwater Quality
   A Watson, C Linklater and J Chapman
   113

New and Emerging Technologies

Applications of Advanced Remote Sensing Systems during a Mine Life
   B P Banerjee and S Raval
   119

Can Mining Be Part of the Circular Economy or Is It Squaring the Circle?
   G Corder and A Golev
   124
Predicting, Assessing and Managing Sediment Plumes Generated by Sea Floor Mining
   R Grogan 127

Emerging Technology for Economic and Ecological Sustainability in the Rehabilitation of Metal Mine Tailings
   L Huang 131

Utilising Mineralised Mining Waste – Contributions to the Circular Economy
   É Lèbre and G Corder 135

Progress in Tropical Nickel Phytomining
   P N Nkrumah, P D Erskine, G Echevarria and A van der Ent 138

Rehabilitation – Objectives and Outcomes

Reassessing Rehabilitation Objectives and Targets for Mature Mining Operations in Queensland
   A R Butler and T R Anderson 142

Bowen Basin Coalmine Spoil Classification for Improved Mine Rehabilitation Outcomes
   B Emmerton, J Burgess, T Baumgartl and P D Erskine 145

Preparing for Progressive Mine Rehabilitation Sign-off in Queensland
   P D Erskine, A Fletcher and P Swart 151

Earthworks or Landforms? Designing for Lease Surrender
   S J Henderson 154

Recognising and Integrating Stakeholder Landform Expectations into Life-of-mine Planning
   A Hine and P D Erskine 157

Fire Behaviour in Buffel Grass Dominated Mine Site Rehabilitation in Central Queensland, Australia
   P McKenna, V C Glenn, P D Erskine, D Doley and A Sturgess 161

Zooming Out – Learning to See Rehabilitation through Stakeholders’ Eyes
   J L Merritt 166

Optimising Land for Beneficial Use During and After Mining
   D Murdoch and J Purandare 169

Bed Load Losses from Experimental Plots on a Rehabilitated Uranium Mine in Northern Australia
   M J Saynor and W D Erskine 171
Social Licence and Engagement

Sustainable Mining – Indigenous Community Benefit
   M G Annandale, G Castelain and J A Meadows 176

Social Licence to Close?
   J A Braithwaite 179

Out of the Box – the Power of Social Identities in Engagement Processes
   S Carr-Cornish and K Moffat 183

The Social Licence to Operate and Drivers for Change – Resource Reporting and Mine Material Characterisation
   G A Maddocks, G D Corder, J Heyes and R J Stewart 186

A Conceptual Framework to Understand the Local Community/Social Impacts of Mining
   T G Measham and D A Fleming 191

Social Licence in Real-time – Using Dynamic Methods to Support a New Kind of Community Relationship
   K Moffat, N Boughen, L Brooks and A Zhang 194

Surface Water – Flows and Quality

A Decision-making Framework for Water Supply and Flood Protection Options in Net Present Value Terms
   H J J Boshoff and A J Karrasch 199

Landscape-scale Assessment of Watercourses in Remote Arid South Australia to Inform Mine Planning to Mine Closure
   C Ferguson, K White and M Harding 203

Derivation of High Reliability Water Quality Guideline Values for Cobalt in Freshwaters – Improving Water Quality Guidelines for Better Water Quality Compliance Management in Mining
   A C Hogan, A R Butler, F Butler and G E Batley 208

Life-of-mine Spillway Strategy – Managing Risk Associated with Surface Water at a Tailings Storage Facility
   M J Ind, M Rynhoud and K Brand 212

Improving the Reliability of Stream Diversion Designs in Mine Closure Plans Using a Morphological Tool
   S Szylkarski, B Willis-Jones, S Tjerry and I Dubinski 215
