

# MILL OPS 2016 CONTENTS

## Comminution Testing

---

Global Mining Standards and Guidelines for Determining Comminution Circuit Efficiency <i>A Giblett and M Daniel</i>	3
HIT – a Portable Field Device for Rapid Testing at Site <i>T Kojovic</i>	9
Calibrating Comminution Models Using Operating Data to Forecast and Optimise Plant Performance <i>A L Zawadski and B G Putland</i>	17

## Fine Grinding

---

IsaMills™ at Kalgoorlie Consolidated Gold Mines – from the M3000 to the M10 000 and Replacement of the Roasters at Gidji Processing Plant <i>G S Anderson and N W McDonald</i>	29
Operating Performance of the Phu Kham IsaMill™ <i>G Harbort and D Zoetbrood</i>	39
Optimising the Telfer Pyrite Re grind Circuit – Effect of Dissolved Oxygen Demand <i>M McMahon, D R Seaman, P Sharman, B Adamson and B A Seaman</i>	51
Design, Installation, Commissioning and Operation of Fine Grinding Technology at the Kevitsa Mine <i>B Nielsen, H Lehto and B Musuku</i>	59

## Flotation Developments

---

<b>KEYNOTE:</b> Upgrades, Modernisations and Expansions ... Where Will the Expertise, Capability and Skills Come from in the Future? <i>R Coleman, J King and T Hunter</i>	69
Effect of Clay Rheology on Flotation of a Refractory Gold Ore <i>L Basnayaka, N Subasinghe and B Albijanic</i>	77
Reflectance Spectroscopy with X-ray Fluorescence for Rapid Online Assaying in a Copper-nickel Flotation Plant <i>O Haavisto, T Maksimainen, A Rantala, J Timperi and J Kaartinen</i>	85
Changing Trends in Column Flotation Use – Their Impact for Australian Mill Operators <i>G Harbort, N Deonarain, D Frost and T Lipiec</i>	93
The Impact of Fluidised-bed Flotation for Treating Coarse Sulfides <i>J N Kohmuench, H Thanasekaran, M J Mankosa and G H Luttrell</i>	105

## Flotation Operations

---

- A Multidisciplinary Approach to the Optimisation and Control of a Copper-zinc Grinding and Flotation Circuit  
*N Arslan, M Westcott, F van der Walt, D Hatton, M Taghimohammadi, F Orrante and S Wilson* 115
- Didipio Flash Flotation and Gravity Recovery Circuit  
*H Cardenas, M McGrory, G Webb, J Paredes, R Setiagani, K A Villaspir, L E Manguba and A Rodolfo* 123
- Metallurgical Performance of Outotec's e500 TankCell® at the Kevitsa Cu-Ni-PGE Concentrator  
*R Crosbie, T Mattsson, B Murphy and T Maksimainen* 127
- Defying Gravity – Brownfield Continuous Improvement  
*L D'Uva, J Robinson and T Bell* 135
- AEROPHINE® 3418A Promoter as a Secondary Collector to Boost Nickel Recovery at Forrestania Nickel Operations  
*S Emery, M Flynn, K Tan and C Munro* 145
- On-site Process Mineralogy – Linking Departments and Disciplines with the Common wGoal of Increasing Plant Performance  
*K Jones and D Morgan* 149

## Gold Developments

---

- The Simple Facts about Sampling Gold Ores  
*G J Lyman, I G Robertson and T Day* 159
- Application of an Integrated Liberation Leach Model for Process Optimisation  
*T D H McGrath, W P Staunton, R Byleveld and J J Eksteen* 173
- Upgrading Low-grade Gold Ore Stockpiles by Preconcentration Using Ore Sorting – an Assessment of the Economic Impact and Viability  
*A N Parry and G van Wyk* 179
- Optimisation of Complex Gold Processing Plants with Multiple Unit Operation Constraints – the Newcrest Planning Scheduler  
*D R Seaman, R P Toohar and B A Seaman* 191

## Gold Operations

---

- KEYNOTE:** Using Metallurgical Data to Drive Continuous Improvement  
*R Dunne* 201
- Continuous Carbon Concentration Measurement at Newmont Boddington Gold  
*C McCamley* 207
- Syama Gold Mine – the Journey towards a Class-leading Gold Mine  
*R Sinclair, I Hunter and D Landwehr* 213
- Optimising Carbon Management – Increasing Gold Recovery and Decreasing Costs with the Carbon Scout  
*W P Staunton, T D H McGrath, C Ypelaan, O Baker and J J Eksteen* 225

## Instrumentation

---

- Greater Use of Geoscan On-belt Analysis for Process Control at Sepon Copper Operation  
*L A Balzan, T D Jolly, A R Harris and Z Bauk* 231
- Measuring and Utilising Ore Quality Variability Using Real-time On-belt Elemental Analysis to Improve Mill Feed Quality  
*H Kurth* 239
- Particle Density Meter  
*N W A Lambert, N D Cox and R Nicholson* 245
- Experience with FloCEP® Slurry Flow Conditioning at Evolution Mining's Edna May Operation  
*D P Taplin, S G Doig and S H Algie* 251

## Maintenance

---

- Advancements in Condition Monitoring on Mill Drive Trains for Proactive Maintenance and Early Fault Detection Purposes  
*M Neurohr, S Stratton and T Roesch* 263
- Concentrate Thickeners Feedwell Replacement  
*M Thompson* 273
- Predictive Maintenance Using Simulation and Machine Learning  
*D Willingham and R Marchant* 279
- Regular Measurement Defines Upgrades on Scrubber Screens  
*R Wilson, S Luke, B Freeburn and R Williams* 285

## Milling Operations

---

- Grinding Circuit Practices at Newmont  
*A Giblett and S Hart* 293
- The Transition from Semi-autogenous to Autogenous Milling at Waihi Gold  
*C Haines and D Bertoldi* 303
- Simplified Hybrid Semi-autogenous Grinding Mill Control – Explanation and Practical Results at the Porgera Concentrator  
*S Ngunz, F van Zyl, F Orrante, E Beltran, M Westcott and S Wilson* 313
- Understanding Size Effects of Semi-autogenous Grinding (SAG) Mill Operation as a Pathway to Solving Feed Disturbances – Case Study Using the MMG Century SAG Mill  
*R A Pax and B Cornish,* 321
- Optimisation of Installed Mill Power Post-installation of Secondary Crushing Circuit at Northparkes Mines  
*Y Sulianto, T Trott, D Morgan, T Bell, F Kock and B G Putland* 331

## Our Industry, Its Cycles and Future

---

- KEYNOTE:** Back to the Future – Still on the Dark Side  
*P D Munro* 341

The ABC of Mine to Mill and Metal Price Cycles  
*P Cameron, D Drinkwater and J Pease*

**349**

## **Tailings**

---

BioHeap® - Breaking the Grade/Recovery Curve for Nickel Concentrators  
*J Fewings, S Seet, T McCredden and C Fitzmaurice*

**361**

Full Cycle Tailings Management at Fosterville Gold Mine  
*L P Gray*

**369**

Caijiaying Dry Tailings Storage  
*J T Waldram and R Jia*

**379**

Author Index

**383**
