

IRON ORE 2019 CONTENTS

Keynotes

Optimising value – unlocking potential on the revenue side of the value equation <i>A D Brent</i>	2
The HIs melt technology: from Australia to China... and back again? <i>N J Goodman</i>	3
R&D applications for sustainable mining <i>N K Nanda and A Misra</i>	14
Recent research and development topics of iron-making technologies in Nippon Steel Corporation <i>K Saito</i>	19
Collaboration delivers value to the mining industry <i>O Verezub and J Cucuzza</i>	20

Agglomeration

Influence of drum operating parameters on granulation <i>M Adam, J Addai-Mensah, J Begelhole, R K Asamoah and W Skinner</i>	22
The determination of optimum granulation moisture of iron oxide ore blends using their moisture saturation capacities <i>M Adam, J Addai-Mensah, J Begelhole and W Skinner</i>	37
The answer isn't always $\Phi=25^\circ$: why reducing consultant input during downturns can hurt the Australian iron ore industry <i>H Baxter-Crawford</i>	49
Evaluation of different blast furnace sinters using standard and novel experimental techniques <i>A Bhattacharyya, S Wegscheider, J Schenk, B Geier and E Schuster</i>	57
Cold briquetting of iron ore fines for DRI production: challenges, possibilities and solutions <i>A Bhattacharyya, C Biswas, M K Mitra and R Dey</i>	62
Optimising the sintering process at Port Kembla using real time feed composition <i>N Di Giorgio, D Pinson and G Noble</i>	68
Sintering behaviour of adhering fines and nucleus particles of ores <i>H Han, L Lu, S Hapugoda, J Begelhole and R Holmes</i>	77
Characterisation of iron ore sinter phases by optical microscopy and EPMA <i>S Hapugoda, L Lu, E Donskoi, H Han, J Manual and Y Yu</i>	88
Reaction model to estimate accompanying carbonaceous material amount in carbon-core fired pellet and a few considerations of its high reducibility <i>K Iwase, T Higuchi, T Yamamoto, K Fukada and T Murakami</i>	101
Improvement of sintering characteristics by the briquetting of high alumina iron ore and ultrafine iron ore <i>S W Kim and I K Suh</i>	111
Process monitoring for iron ore pelletizing – XRD in combination with PLSR <i>U König</i>	121
Separate granulating efficiency for sinter strength and reducibility based on promotion of magnetite ore oxidation <i>M Matsumura, T Takayama, K Hara, Y Yamaguchi, T Ishiyama, K Higuchi and S Nomura</i>	127

Promoting assimilation of magnetite fine ore for CO ₂ reduction from sintering process <i>A Morioka, M Matsumura and J Okazaki</i>	140
Quality of sinter ore by flame zone shape in bed location <i>Y S Seo, B C Kim, H M Lee and H J Yoon</i>	145
Measured and modelled air flow rates during the iron ore sintering process: green and sintered beds <i>T Singh, T Honeyands, S Mitra, G Evans and D O'Dea</i>	156
Study on multi-component calcium ferrites formation by using XRD-Rietveld analysis <i>T Takayama, K Higuchi and J Okazaki</i>	166
Effect of Al ₂ O ₃ and FeO composition on RDI in sintering process <i>S Y Won, J H Choi, J M Oh, H J Yoon and J H Kim</i>	176
Influence of the magnetite concentrate properties on sintering performance of magnetite-hematite-goethite iron ore blends and sinter quality <i>C Yang, D Zhu, J Pan, Q Li and L Lu</i>	182
Wetting behaviors of calcium ferrite on gangues in iron ore sintering process <i>M Yang and X Lv</i>	189
Effect of alumina and its types on sintering performance <i>D-Q Zhu, Z-Q Guo, J Pan, S-W Li and C-C Yang</i>	196
Automation	
Predictive maintenance in mining with MATLAB <i>B G Dijkstra</i>	207
Next generation reclaimer automation – using real-time high-resolution 3D LIDAR to optimise stockyard productivity and ship loading efficiency <i>J Franke and P J Wighton</i>	215
Taking back control: the benefits of introducing centralised production systems to entire brownfields operations <i>R Mavrick and B Derada</i>	230
AI algorithms to monitor the performance and condition of vibrating machines <i>J Schäfer</i>	239
Digital optimisation: lessons learned from other industries at the forefront to deliver iron ore mines of the future <i>S Yacoub</i>	243
Characterisation and Geometallurgy	
Use of strength, hardness and abrasion parameters to increase orebody knowledge and material characterisation <i>J Buswell, D Bowman and J Batchelor</i>	250
Continuous visible to far infrared spectroscopy for the prediction of iron ore properties <i>J Carter, P Urlings and L Dixon</i>	264
Using wireline logged density to help define an elusive contact in a historical channel iron deposit <i>T Cross, M Wlasenko and P Mackenzie</i>	280
Automated optical image analysis of lower grade iron ores <i>E Donskoi, J R Manuel, S Hapugoda, A Poliakov, T Raynlyn, P Austin and M Peterson</i>	291
3D characterisation of iron ores: imaging the invisible? <i>B Godel, E Ramanaidou and M Verrall</i>	306
Comparison of the mineralogy of iron ore sinters using a range of techniques <i>T Honeyands, J Manuel, L Matthews, D O'Dea, D Pinson, J Leedham, G Zhang, H Li, B Monaghan, X Liu, E Donskoi, N Webster and M I Pownceby</i>	312

Downhole geophysics sensors for reverse circulation drilling in iron ore <i>T Hopper, M Schubert, B Moran, P Kalisch, M Crumby, N Buters, K Ott, K Rogozinski, G Joldes, Q Morgan, T Neville, H Shanmugam, R Zaeper, J Lowe and A Prince</i>	329
The potential for pure magnetite concentrate from Hawsons <i>R L Koenig and M Tschaban</i>	336
Ore type characterisation of the Per Geijer iron ore deposits in Kiruna, Northern Sweden <i>P Krolop, K Niiranen, S Gilbricht and T Seifert</i>	349
Geometallurgical characterisation of a channel iron deposit ore <i>H Li, D J Pinson, P Zulli, L Lu, R J Longbottom, S J Chew, B J Monaghan and G Zhang</i>	360
Downhole assays in the Pilbara <i>J Market, C Byrne, D Robinson, P Jeanne and H Rossiter</i>	372
A geometallurgical approach to product predictions at a channel iron deposit in the Pilbara <i>T Nguyen, S Talukdar, M Wlasenko and J McKee</i>	393
Quantifying the composite microhardness and fracture toughness of iron ore sinter and their relationship to sinter metallurgical indices <i>M J Peterson</i>	401
Iron ores of the Hotazel Formation, Northern Cape Province, South Africa <i>A J B Smith, J Gutzmer, N J Beukes and B C Chisonga</i>	420
Downstream Processing	
Titaniferous magnetites as a source of vanadium titanium and iron <i>D Connelly</i>	441
Effect of coke breeze and CaO on oxidation of magnetite concentrate <i>T Murakami, D Maruoka and E Kasai</i>	449
Development of an experimental fluidised bed reactor for the processing of New Zealand titanomagnetite ironsand <i>S W Prabowo, D del Puerto, M J Ryan, R J Longbottom, C W Bumby and B J Monaghan</i>	456
Hydrogen reduction of New Zealand titanohematite pellets <i>A Zhang, R J Longbottom, M Nusheh, C W Bumby and B J Monaghan</i>	464
Geology and Geostatistics	
Don't expect normal sequence – the opportunity of unconventional Marra Mamba exploration in the South-Eastern Hamersley Province <i>A Baird, G Garton, L Nicholas, J Olafson, F Paulus and B Rochat</i>	472
Gangue mineralogy of titanium (Ti) in the Kiirunavaara iron ore deposit, Northern Sweden <i>K Niiranen and H Rutanen</i>	483
Eliwana iron ore deposits <i>C Simpson and R Walker</i>	492
Drill hole spacing analysis in an iron ore deposit in the Pilbara, WA <i>C Taylor, D Guibal and E Retz</i>	505
South Australian magnetite – the geology behind the opportunity <i>M Twining</i>	510
Health, Safety, Environment and Community	
Focusing on the critical few risks – ensuring control effectiveness through accountability <i>D L Head and A M Masciangioli</i>	529
Physico-chemical profile of PM _{2.5} emitted from the iron ore sintering process and emission reduction suggestions <i>Z Ji, X Fan, M Gan, X Chen, X Huang, W Lv, G Wang and T Jiang</i>	537

Evaluation of mine dewatering and related impacts at a deep underground iron mine in northern Sweden <i>W Linderfelt and P Tara</i>	544
Progress in evidence-based design of rehabilitated vegetation on mine sites <i>R K Steedman, L Mattiske and T Collie</i>	563

Mining

Downer's approach into mine haul roads treatment <i>H Haghighi, J Tan, J Eggleton and A Smedley</i>	576
The application of unmanned aerial vehicle technology to detect blast movement <i>J Loeb, B Pesic and K Dasgupta</i>	588
Product prediction in evolution – embracing geometallurgy concepts <i>E Phuak, N Albina and T Nguyen</i>	596
Autonomous haulage technologies in iron ore <i>R Price</i>	605
Machine learning – limiting bias and validating for value <i>O Rondon, J Coombes and A Cook</i>	611

New Equipment

Advances in superfine crushing – a study on IMPTEC superfine crusher (SFC 160) operating parameters <i>E Baawuah, C Kelsey, J Addai-Mensah and W Skinner</i>	625
Evaluation of the performance of Cyclomag PMS-300 S2 <i>E Baawuah, C Kelsey, J Addai-Mensah and W Skinner</i>	637
Process improvement at Kumba Iron Ore Sishen and Kolomela mines through the use of GEOSCAN on belt analysis equipment <i>L A Balzan, E Swart, L Gray and M Kalicinski</i>	649
AirSprings – adjustable spring system for increasing productivity and upgrade workforce safety <i>K Jung, J Herzog and N Kriel</i>	660
Optimising the value of iron ore using a novel rail-running conveyor system <i>C Wheeler, M Carr, M Lurie and B Chen</i>	668

Processing

Influence of slimes on gravity separation of iron ore fines in a REFLUX™ Classifier <i>J L Carpenter, S M Iveson, J Zhou, J Sutherland and K P Galvin</i>	685
Downstream value adding of Western Australian iron ores <i>D Connelly</i>	693
Exploring iron ore fines beneficiation in a South African Context <i>C Da Corte, A Singh and C Bergmann</i>	703
Developments in the wet and dry processing of lower grade magnetite ores <i>C G Kelsey, J R Kelly, C S Kelsey and B C Kelsey</i>	722
Bloom Lake: flowsheet improvement and recommissioning <i>F Lavoie, P Dunn and A Belleau</i>	730
Reducing the viscosity of concentrated iron ore slurries with composite additives for quality upgrade, reduced power, safer tailings storage and smaller environmental footprint <i>Y K Leong, J Drewett and S Bensley</i>	738
Tailings valorization and iron recovery from spiral concentrators circuit <i>J Mesquita, F Vasconcelos, A Pirson, A C Araujo, T Sylow and L Gotelip</i>	744

The influence of moisture in the vibrating screen sizing and selection processes <i>E Nunes Filho, R Ogawa, E Pereira, T Ohashi and H D Junior</i>	754
Dry beneficiation of low-grade goethite-rich iron ore fines by air classification, reduction roasting and magnetic separation <i>V Nunna, S Hapugoda, S Gaekwad Eswarappa, S K Raparla, R Kumar and N K Nanda</i>	766
Grinding circuit evolution <i>M Sherman and A Collins</i>	786
The impact of sustainable industrial practice on process suspension rheology in iron ore <i>P Slatter and T C Ooi</i>	796
Overcoming the phosphorous issue at the Agbaja iron ore project in Nigeria <i>L A Sylwestrzak, S Moses, O Demir and S Tsebe</i>	805
Flotation applied to iron ores with complex mineralogy <i>C H Veloso, L O Filippov, I V Filippova and A C Araujo</i>	823
Opportunity is 'wear' science and awareness meet! <i>G A Wellwood</i>	828
Technical Marketing	
Akpafu-Todzi ironmaking industry – the past, present and future <i>B S Agbenuvor, C K Owusu, P Koshy and J R Dankwah</i>	843
Not all sub-60% Fe ores are the same: the link between processing and sintering of Fortescue ores <i>G S Beros</i>	853
Influence of sintering conditions on the reducibility of iron ore sinter analogues <i>T Harvey, D O'Dea, G Evans and T Honeyands</i>	862
Chemical interaction between basic sinter and Newman blend lump analogues <i>X Liu, T Honeyands, G Evans, J Chen and D O'Dea</i>	872
Strategy for efficient utilisation of low grade iron ores in sintering <i>L Lu, H Han, M Adam, J Begelhole, M Kilburn, R Smyth, A Edenton and R Holmes</i>	880
