

MINE VENT 2019 CONTENTS

Keynotes

Ventilation and workers health: a regulator's perspective <i>A Chaplyn</i>	2
Avoiding repeat incidents – learning the lessons of the past <i>J R Leeming</i>	3
The reasonable location of high drainage roadway to control gas exceeding and spontaneous combustion in goaf <i>S Li, P Xu, Y Ding and H Lin</i>	15

Case Studies

Study on turbulent dispersion simulation of concentrative methane emission in mine ventilation network <i>K Y Chen, S G Li, F B Zhou, L J Wei and T Q Xia</i>	33
Risk assessment of spontaneous combustion of sulfide ores based on thermal analysis and AHP method <i>Z L Chen and H M Zhou</i>	44
Study on distribution law of air leakage in gas drainage borehole <i>J Gao, J Liu, J Zhang and M Yang</i>	53
Ventilation air methane: a simulation of an optimised process of abatement with power and cooling <i>F J Nadaraju, A R Maddocks, J Zanganeh and B Moghtaderi</i>	62

Coal Mine Ventilation

Ventilation control system multiphase implementation approach driven by safety and production <i>E Acuña, C Visage, H Mohle and G Durandt</i>	81
Implementation of energy efficiency and ventilation on demand at the Aguas Teñidas mine <i>J de Miguel Fuentesvilla and R Castro Pérez</i>	91
Risk analysis of ventilation system design regulations for mines operating in Kazakhstan <i>S Sabanov, Y Tussupbekov, A Karzhau and B Aldamzharov</i>	107

Coal Seam Gas, including Gas Drainage / Storage and Utilisation

Study on microstructure differences of coal samples before and after loading <i>J Liu, J Gao, G Jia and M Yang</i>	118
Study on the heat removal efficiency of thermal probe on coal stockpile under different arrangement and ambient air velocity <i>W Gaoming, M Li, W Hu, L Yanfei and W Weifeng</i>	133

Detection and Control of Spontaneous Combustion, and Diesel Emissions Control and Measurement

Investigation of combustion properties and burning behaviour of Australian Hunter Valley coal dust <i>M J A Al-Zurajji, J Zanganeh and B Moghtaderi</i>	147
Mechanisms for spontaneous combustion events in low intrinsic reactivity coals and carbonaceous shales <i>J Theiler and B B Beamish</i>	160

Health and Safety Hazard Management

Tracer gas study of nano diesel particulate matter behaviour in secondary ventilation practices <i>S Black, S Wilkinson, L van den Berg and K Manns</i>	166
Using ventilation to drive mine productivity <i>J Fernandez</i>	179
The influence of atmospheric pressure change principles on gas sampling in mine closed fire zone <i>B W Lei, B Wu, H Y Wang and H Q Zhu</i>	194
A study on the performance of novel blast-proof door under gas explosion <i>R K Pan, T Qiu, J Wang, L G Zheng, X B Zhang and M G Yu</i>	202
Impact of where a measurement is taken on the value of a heat stress index <i>M A Tuck</i>	213
A novel approach for predicting the incubation period of spontaneous combustion of coal based on thermogravimetric analysis <i>X X Zhong and F Hou</i>	222

Health Hazard Management-Respirable Dust / Diesel Emissions

Robust control of diesel engine particulate emissions in underground coal mining <i>N Coplin</i>	234
Psychrometric evaluation of workplace impacts upon change to battery mobile equipment from diesel <i>K Macdonald, C McGuire, W Harris and D Witow</i>	244
Working toward a better understanding of diesel engine exhaust emissions for underground mines in Western Australia <i>J Oding</i>	249
Study on coordinated control and intelligent regulation for the disaster smoke flow in the coal mines <i>K Wang, H Hao, S Jiang, Z Wu and H Shao</i>	261
Intelligent mining at Huangling Mine, with special mention of ventilation safeguard system <i>Z Yan, J C Tien, Y Wang and X Chang</i>	272

Heat and Refrigeration

Predicting annual underground thermal flywheel effects <i>M D Griffith and C Stewart</i>	284
Effective temperature: is it an effective heat stress management index? <i>M A Tuck and B Belle</i>	292

Methane and Coal Dust Explosions

Ventilation and gas management strategies for re-entry to Pike River Mine Drift <i>R Hughes, R Moreby, B Poborowski and J Rowland</i>	308
Analysis of methane and coal dust explosion at two stage process using video and image processing <i>A Ihsan, N Priagung Widodo, B Sulistianto and D Agung Prata</i>	319

Ventilation Planning and Management

Performance analysis of surface goaf hole gas drainage systems and use of CO triggers for spontaneous combustion risk management in Australian coal mines <i>B Belle and G Si</i>	331
Ventilation of waste and orepasses, tramming routes and drawpoints <i>D J Brake</i>	342

Ventilation planning considerations for the Carrapateena Sublevel Cave <i>K Manns, J Holtzhausen, A Mooney and L van den Berg</i>	355
Calibrating model airway size and resistance with survey asbuilt data <i>F Michelin, C Stewart, M D Griffith and T Andreatidis</i>	363
Accuracy and confidence prediction in ventilation models <i>C M Stewart and M D Griffin</i>	369
Selection guide when considering rental or fixed mine cooling plants <i>L van den berg, J Raubenheimer, H Mohle and S Bluhm</i>	376
Study on the effect of seasonal air-flow on high temperature environment in deep mines and its prevention technology <i>X Yi, W Yu, L Ma, L Zou and G Wei</i>	385
