WORLD GOLD 2019 CONTENTS

Keynote Presentations
Underground mining: we are just scratching the surface
  B Beament
  2
Securing Australia’s golden future
  J Beyer
  3
Fit-for-purpose gold leach systems
  J J Eksteen
  4
Mineral resource estimation technology and challenges in the 21st century – when will the robots be taking over?
  I M Glacken
  5
Unlocking sustained value from gold megaprojects
  S Hille
  12
Accelerating innovation in the gold mining sector
  E Lewis-Gray
  13
Modelling approaches and their application in comminution circuit design
  S Morrell
  14
The story of digital
  D van der Spuy
  33

Digital Transformation / Industry 4.0, Exploration of New Gold Deposits, and Geology on Orogenic Gold Deposits
Reverse circulation drilling for gold: geological context and sampling method validation – Córrego do Sítio Mines, Brazil
  C C O Gomes, I C Spangenberg, M M S Vieira, A P Bhering and J FC L Costa
  35
New insights into the Central Gawler Gold Province, SA
  J C Gum, J Payne and M Twining
  55
A geodynamic atlas for West African mineral systems
  M Jessell
  60
Give a mate a break, please
  T A Lee
  65
The influence of basin architecture on Au fertility – evidence from the Capricorn Orogen
  S A Occhipinti, M Lindsay, V Metelka and A R A Aitken
  87
Orogenic gold mineral systems of the North American Cordillera – a review
  S M Rowins
  95
Orogenic gold deposits in the Yilgarn craton: a review
  N Thébaud and J Miller
  96

Gold Mine Optimisation – Mining, Processing and Exploration
KellGold cyanide-free low-emissions recovery of metals from polymetallic concentrates
  M D Adams, L A Smith and K S Liddell
  102
X-Ray computed tomography for 3D analysis of gangue mineral rejection by gravity preconcentration of sulfidic gold ores
  S S Bacchuwar, N P Mkandawire, T McGrath, C L Lin and J D Miller
  111
INCO cyanide destruction insights from plant reviews and laboratory evaluations
  P L Breuer and D M Hewitt
  130
Gold Ore Characterisation Approaches for a New Era of Processing, and Mineralogy and Characterisation

The mineralogy and processing potential of some ores from the Commonwealth prospect in NSW, Australia

M G Aylmore, J J Eksteen, M G Jones and M Wells

Grain morphology and hosting characteristics as determining factors in micron to sub-micron gold recoverability

E Hill and S Graham

Mineralogical controls on gold extraction: a comparison of leaching techniques on South African ores

K Youlton, J A Kinnaird and B Youlton

Innovative Mining Practices / Developments

Going local – innovating resource estimates to improve investment decisions

J Coombes, T Tran and A Earl

Laboratory and field evaluations of a new non-toxic gold leach reagent

X Dai, P Breuer, D Hewitt, Y Pranolo, R Meakin, R Rajasingam and W Robertson

Hydro hoisting: a new approach

P D Fraser

Potential of the dense media cyclone for gold ore preconcentration

N P Mkandawire, T McGrath, A Bax and J Eksteen
Gold roasting technology advances and how to handle complex concentrates more sustainably
D Nurgaliyeva, M Runkel, K-H Daum, J Güntner, J Hammerschmidt and S Bräuner
379

Low- and high-pressure injection for secondary recovery of gold in heaps
D F Rucker, M T Levitt and S Calendine
395

Significant increase in gold recovery using Jameson Cell flotation technology
G Stieper, V Lawson, P Voigt and M Hourn
404

New Developments in Comminution (Crushing and Grinding), and Preconcentration and Coarse Particle Gangue Rejection

Decision support for ore sorting and preconcentration in gold applications
R A Bearman, D J Bowman and R Dunne
413

Exploiting heterogeneity: improving head grade and project value
R J McCarthy
430

Gangue rejection responses for a variety of gold ores
T D H McGrath, A R Bax, J J Eksteen and J L McGrath
441

Grinding circuit evolution
M Sherman and A Collins
456

Ore to be sorted? Guidance via geometallurgical modeling of gold mining value chain
M Talikka, A Remes and M N Scheidema
466

Preoxidation of Refractory Ores

Enhancing gold recovery from refractory bio-oxidised gold concentrates through mechano-chemical activation
R K Asamoah, W Skinner and J Addai-Mensah
475

Kibali Gold Mine sulphide concentrate treatment – understanding the preoxidation of sulphide concentrates
T Mahlangu, F A Sumaili, D N Ayiz, B M Sindani, P Mande, G du Toit, M Verster, L S Mogashoa and P W Lotz
488

Pokrovskiy pressure oxidation (POX) hub – from laboratory to commercial production
P Zaytsev, Y Shneerson, V Fedorov, A Zavalujev, E Kudrin, A Afanasiev, T Karjalainen, K Lilikung and T Haakana
504

Process Flowsheet Optimisation

The Auplata modular gold recovery plant
D Auerswald, N Van Niekerk, C Hutamo and S Moses
520

Application of a co-adsorption model for the design of CIL/CIP circuits
A R Bax, G M Wardell-Johnson and W P Staunton
527

Flowsheet development of a refractory gold ore to minimise arsenic issues in the environment
D Connelly
536

Porgera Gold mine, flotation, autoclave, leaching and acacia reactor improvements
P Gueme, D Akis and B Burger
545

Transferring R&D results into optimal process design – the good and the bad
L Lorenzen and A Kerr
566

Swirl flow agitation for a BIOX neutralization process
B Nguyen, S Mills, A Nash, M Davoody, D Harris, K Mohanarangam, W Bruckard, L Graham and J Wu
577

Operational insights to carbon-in-leach processing through dynamic simulation
J W Steyn and P Moyo
584

Improving recovery at the Syama Gold Mine
M Wardell-Johnson, J Wilson and A Crooks
594
Sensors, Monitoring and Control

Sensor-based ore sorting methodology investigation applied to gold ores
  J A Dumont, M G Lemos and C Robben

Collaboration leads to real time control of gold leach circuits
  A H Gray, E Craig, T McGrath and W P Staunton

Outotec Roaster Optimizer in pyrite processing
  S Haus, M Runkel and J Hammerschmidt

Online gold analysis using X-ray fluorescence
  T Koskinen, L Veki, J Välimaa, A Pelli, L Köresaar and J Timperi

Development of a novel in-situ carbon content measurement for CIL and CIP processes
  M J Latva-Kokko, J P Kourunen, J K Ruokanen and J R Peltola

Control and optimisation of a gold milling and flotation circuit
  M Safy, T Mashakane and P Hopstadius

Digital twin application as virtual instruments at Haile Gold Mine
  J P Sepulveda, J Nduwa, W Friesinger, B Schug and C A Cristoffanini

Automating cyanide measurement and control in highly variable complex copper gold ores by applying a modified potentiometric titration determination
  G Zwolak, G G Salvador, P Leckie and E Arriagada

Poster Presentations

Novel biooxidation process for low grade refractory sulfidic ores
  J Ahn, J Wu and J Lee

Unravelling causes of refractoriness in complex flotation and bio-oxidised auriferous concentrates for efficacious gold extraction
  R K Asamoah, W Skinner and J Addai-Mensah

Oxidation of a refractory gold concentrate using pressure, atmospheric and bacterial oxidation processes
  C Casingena, C Czerny, L Paterson and P Carter

Novel technology provides on-line measurement of particle size in individual cyclones: Barrick Cortez case study
  D Cirulis

The Bottle Creek gold project revisited
  D Connelly

Flowsheet options for processing copper gold and gold copper ores
  D Connelly

Pan African metallogeny and gold mineralizations, Central Sudan
  O M Elhassan, H M Hussein and Y Elsamani

Gold adsorption onto activated carbon in the presence of viscosity modifiers
  R A Lauten

Mineralogical factors affecting the extraction of gold in various ores
  J Li and J Zhou

Enhancing the leaching rate of gold in alkaline glycine solutions
  E A Oraby and J J Eksteen
